

# R. Thomas Boyd

**Address:** Department of Neuroscience  
The Ohio State University  
4068 Graves Hall  
333 West Tenth Avenue  
Columbus, Ohio  
(614) 292-4391  
FAX (614) 688-8742  
boyd.16@osu.edu

## Education

B.S., Physiology, 1977  
University of Illinois, Urbana, Illinois

M.S., Cell Biology, 1980  
Memphis State University, Memphis, TN

Ph.D., Microbiology/Molecular Biology, 1986  
University of Texas, Austin, TX

## Employment and Training

2000-	Associate Professor of Neuroscience Ohio State University
1997-	Associate Professor of Pharmacology Ohio State University
1990-1997	Assistant Professor of Pharmacology Ohio State University
1989-1990	NIH Postdoctoral Fellow University of California, San Diego
1987-1989	Muscular Dystrophy Association Postdoctoral Fellow University of California, San Diego
1986-1987	NIH Postdoctoral Fellow University of California, San Diego, and The Salk Institute for Biological Studies
1988,1990	Lecturer San Diego State University

## **Publications**

Boyd, R.T., and M.L. Beck (1982). Aldehyde oxidase activity during development in *Musca domestica*. *Comp. Biochem. Physiol.* 73 B :625-630.

Goldrick, M.M., R.T. Boyd, P.D. Ponath, S.-Y. Lou, and P.D. Gottlieb (1985). Molecular genetic analysis of the VkSer group associated with two mouse light chain markers: complementary DNA cloning and Southern hybridization analysis. *J. Exp. Med.* 162: 713-728.

Gottlieb, P.D., R.T. Boyd, P.D. Ponath, and M.M. Goldrick (1986). Restriction enzyme polymorphism in Vk and Jk genes of inbred and wild mice. In *Current Topics in Microbiology*, Springer Verlag, 127: 186-192.

Boyd, R. T., M.M. Goldrick, and P.D. Gottlieb (1986). Structural differences in a single gene encoding the VkSer group of light chains explains the existence of two mouse light chain genetic markers. *Proc. Natl. Acad. Sci. USA* 83: 9134-9138.

Boyd, R.T., M.M. Goldrick, and P.D. Gottlieb (1986). Genetic polymorphism at the immunoglobulin Jk locus (Igk-J) as demonstrated by Southern hybridization and nucleotide sequence analysis. *Immunogenetics* 24: 150-157.

Boyd, R.T. (1986). Molecular genetic analysis of mouse kappa light chain polymorphisms. Dissertation, University of Texas, Austin, Texas.

Yang, J.N., R.T. Boyd, P.D. Gottlieb, and J.P. Dudley (1987). The endogenous retrovirus Mtv-8 on mouse chromosome 6 maps near several kappa light chain markers. *Immunogenetics* 25: 227-231.

Boyd, R.T., M.H. Jacob, S. Couturier, M. Ballivet, and D.K. Berg (1988). Expression and regulation of neuronal acetylcholine receptor mRNA in chick ciliary ganglia. *Neuron* 1: 495-502.

Ponath, P.D., R.T. Boyd, D.M. Hillis, and P.D. Gottlieb (1989). Structural and evolutionary comparisons of four alleles of the mouse Igk-J locus which encodes immunoglobulin kappa light chain joining segments. *Immunogenetics* 29: 389-396.

Berg, D.K., R.T. Boyd, S.W. Halvorsen, L.S. Higgins, M.H. Jacob, and J.F. Margiotta (1989). Regulating the number and function of neuronal acetylcholine receptors. *Trends in Neurosci.* 12:16-21.

Berg, D.K., R.T. Boyd, S.W. Halvorsen, L.S. Higgins, M.H. Jacob, J.F.

Margiotta, and A.E. McEachern (1989). Regulation of neuronal acetylcholine receptors by cell-cell interactions. In *Nicotinic Receptors in the Central Nervous System*, NATO Workshop, Venice, pp. 283-297.

Boyd, R.T., M.H. Jacob, A.E. McEachern, S. Caron and D.K. Berg (1991). Nicotinic acetylcholine receptor mRNA in dorsal root ganglion neurons. *J. Neurobiol.* 22: 1-14.

Boyd, R.T. (1994). Sequencing and promoter analysis of the genomic region between the rat neuronal nicotinic acetylcholine receptor beta 4 and alpha 3 genes, *J. Neurobiol.* 25(8), 960-973.
